

GALLET F1XF

A TOUGH HELMET FOR THE TOUGHEST JOB

WHEN YOU GO IN, WE GO IN WITH YOU.

While pioneering revolutionary jet style helmet in the global fire service since 1985, we have been striving for over 35 years to continuously improve and protect our firefighters with the iconic F1 helmet. The GALLET F1XF is fit for daily and complex structural firefighting operations.

Fires are burning hotter and faster

With modern regulations and construction materials, structural firefighting is more dangerous than ever¹. With more airtight houses or buildings, temperature in case of a fire can become really intense and hazardous, increasing the risk of potential flashovers.

Emerging risks such as electrical hazards

Every house, every building, and every vehicle is now powered by some level of electricity. Electricity, is therefore, one of the hazards on the fireground and with a proactive approach such as Fire helmets designed and approved for electrical hazards, injuries can be greatly reduced among firefighters and other first responder personnel.

Fire response and effective decontamination

As synthetic or plastic material, which is oil or hydrocarbon-based continues to replace natural materials, toxic fumes containing carcinogenic material continue to be a point of concern for firefighters. Fire helmets should be designed to promote easy and effective cleaning after a fire response or a training event.

GALLET F1XF

WHY CHOOSE THE GALLET F1XF?

Inspired from the traditional fire helmet comb, the GALLET F1XF has provided trust and confidence to its wearers for over 35 years! Made and carefully assembled in France, it is easily configurable and ready to take on a range of tough fire and rescue operations.

RELIABLE

- ✓ The **aramid reinforced impact liner** has been designed to offer an extended coverage with superior thermal protection properties.
- ✓ The interior soft goods integrate in a manner that enhances the **cleanability factor** and can be easily and quickly disassembled with no tools.
- ✓ Optional crown pad, for example, improves **comfort and hygiene** by limiting head contact with suspension straps.

INTUITIVE

- ✓ A **fully accessible ratchet knob**, designed innovatively to remain external even when used with its dedicated neck-curtain.
- ✓ A chinstrap equipped with **easy-to-grab guide loops**, offers superior grip and an easier adjustment with gloves when the helmet is on the head.
- ✓ The components are grouped into **pre-assembled modules** to save time and achieve a disassembly / reassembly time of under 4 minutes!

ERGONOMIC

- ✓ Designed for **long-duration use**.
- ✓ GALLET F1XF carries most of its weight below the ears which leads to a **lower centre of gravity**.
- ✓ A lower centre of gravity is essential for increased **comfort and ergonomics**.

CONVENIENCE

- ✓ An **integrated lighting module** that lights up the natural line of vision through its unique orientation and hands-free operation.
- ✓ A helmet shell that is widened at ear-level to allow **natural communication** during an operation.
- ✓ Integrated **ocular visor** that allows an adjustable fit for corrective glasses wearers via MSA's patented dual pivot system.

MODULAR

- ✓ Wide range of MSA **helmet-mounted head lamps** to maximise visibility.
- ✓ Ability to integrate flexible microphone or bone-conductive headsets to enable **communications** on the scene.
- ✓ An extended **clear or metalized faceshield** option approved to high performance visor standard EN14458:2018 and suitable for electrical hazards as per GS-ET-29 (class 1).

FOCUS ON INNOVATION

External Ratchet Knob and Chinstrap with rear guide loops

Neck curtain with pass-through slot for ratchet

Edge Protection

Integrated Lighting Module – LIXF

Adjustable Ocular Visor

TESTED AND APPROVED

- ✓ EN443:2008 - Structural Firefighting
- ✓ EN16471:2014 - Wildland Firefighting
- ✓ EN16473:2014 - Technical Rescue
- ✓ GS-ET-29 Class 1 Arc Flash level Face Shield

DID YOU KNOW?

From Paris to Hong Kong Fire Brigade, or Generalitat de Catalunya, the most prestigious fire brigades are easily recognisable thanks to our customisable front plate
