

Test Devices

[Compact Test Console and 2 Cases]

Multitest Test Case ND

- For low pressure tests for masks and lung governed demand valves
- Activation of positive or negative pressure by battery operated pump
- Protective suit testing possible with accessories

Test options:

- leak tests of full-face masks
- testing of exhalation valves
- opening pressure for positive pressure masks
- leak tests of demand valves
- opening pressure for normal pressure demand valves
- closing pressure for positive pressure demand valves

Ordering No: 10073519

Design components:

- inflatable dummy head on pedestal complete with filling tube and release valve
- clamp for fixing head on table plate
- low pressure gauge +/- 30 mbar
- low pressure release valve
- round thread demand valve connector
- test tube with round thread for mask testing
- lever operated spigots for switching the pump function between sucking and blowing
- push-button for pump
- battery case [1 MONO type D battery]

Multitest plus Test Console

- Tests for masks and lung governed demand valves at low and medium pressure
- Activation of positive or negative pressure by battery operated pump
- Protective suit testing possible with accessories

Test options:

- leak test of full-face masks
- leak test of exhalation valves
- opening pressure test of exhalation valves
- leak test of demand valves
- opening pressure test of normal-pressure demand valves
- closing pressure test of positive-pressure demand valves
- static medium-pressure test
- dynamic tests with included battery operated pump

Ordering No: D5175744

Design components:

- inflatable dummy head made of rubber incl. filling tube for inflating and deflating the head and connecting tube with standard thread connection for connecting equipment to be tested [various adapters available on request]
- clamp for fixing dummy head
- tightening cap for normal pressure mask exhausting valve
- low pressure gauge +/- 30 mbar
- medium pressure manometer 0-16 bar
- medium pressure connector
- mask testing tube
- medium pressure testing tube
- low pressure release valve
- round thread LDV connector
- battery-operated suction/pressure pump
- push-button for pump
- pump blow/suction operating levers
- battery case [1 MONO type D battery]

Multitest plus Test Case

- Tests for masks and lung governed demand valves at low and medium pressure
- Activation of positive or negative pressure by battery operated pump
- Protective suit testing possible with accessories

Test options:

- leak test of full-face masks
- leak test of exhalation valves
- opening pressure test of exhalation valves
- leak test of demand valves
- opening pressure test of normal-pressure demand valves
- closing pressure test of positive-pressure demand valves
- static medium-pressure test
- dynamic tests with included battery operated pump

Ordering No: D5175743

Design components:

- inflatable dummy head made of rubber incl. filling tube for inflating and deflating the head and connecting tube with standard thread connection for connecting equipment to be tested [various adapters available on request]
- clamp for fixing dummy head
- tightening cap for normal pressure mask exhausting valve
- low pressure gauge +/- 30 mbar
- medium pressure manometer 0-16 bar
- mask testing tube
- medium pressure testing tube
- low pressure release valve
- round thread demand valve connector
- battery-operated suction/pressure pump
- push-button for pump
- battery case [1 x MONO type D battery]

More test device versions are available on request.
