

Why

- ✓ **Portability & Mobility** - Train in remote or elevated locations without prior infrastructure.
- ✓ **Rapid Start** - Minimal heat-up time (2-3 seconds)
- ✓ **Realistic, Controllable Smoke** - the smoke output is safe (non-combustible) and controllable in density.

SMOKEDRILL (SD) 150

SMOKE GENERATOR

The SMOKEDRILL (SD) 150 empowers firefighters to perform low-visibility training drills in any location, completely independent of electrical power. This battery-operated smoke generator is designed for versatility, making it the ideal choice for training scenarios where access to electricity is challenging or impossible. Whether on-site or in remote areas, the SD150 ensures that firefighters can conduct realistic training at any time, anywhere.
